

ClearNails-*pro*

Fungicidal Solution for Onychomycosis

This doctor invented combination of ciclopirox, terbinafine and fluconazole eliminates the entire spectrum of fungi and molds that cause onychomycosis (fungal nail disease).

This unique patented carrier system allows all three medicines to penetrate both the nail (nail plate) and the nail bed, attacking all the places fungus resides.

The topical application renders ClearNails-pro absolutely safe with no toxicity. It has all the advantages of the most powerful oral medication without any of the risks. Sold only by medical practitioners.
