

Footsteps Orthotics

R2: The Footsteps™ R2 features a new and improved increased rigidity shell encased in a tri-laminar EVA/poron outer casing. The polypropylene shell is anatomically designed to provide maximum control and support without sacrificing volume in the shoe. The Poron topcover provides unmatched shock attenuation. Poron performance urethanes provide the highest degree of shock absorption, outperforming competitive materials to offer the best cushion against impact.

Athletic: The Footsteps™ R2 Athletic features a new and improved increased rigidity shell encased in a tri-laminar EVA/poron outer casing. The polypropylene shell is anatomically designed to provide maximum control and support without sacrificing volume in the shoe.

R2 Dress: The Footsteps™ R2 Dress was designed to allow the wearer to enjoy all the comfort and support of our Athletic R2 in most dress shoes which typically have less room in the toebox.

Accommodative: The Footsteps™ R2 Accommodative was designed for "at risk" patients. The R2 accommodative offers the same support and shock attenuation as our athletic R2 but is finished
